Md Shahbaz Uddin

Full Stack Web Developer

Professional Summary

Dynamic full stack web developer with strong proficiency in the MERN stack and an ability to implement Node.js and Express.js APIs efficiently. Expert in React.js for frontend development. Excels at learning new tech stacks quickly, including leveraging Generative AI for innovative solutions.

Experience

Global Web Technology	│Software Development Engineer	April 2024 – July 2024

- Built and maintained MERN stack projects, managing feature development, bug fixing, and manual testing.
- Collaborated with cross-functional teams to translate project requirements into scalable backend solutions.

Projects

Sugar-Cosmetic-Clone   Live Demo Link   Github Repo Link

React   Redux   Node.js   Express.js   Chakra UI

MongoDB   Git   RESTful APIs   Twilio

- Implemented secure mobile OTP login and efficient product search functionality.
- Designed and optimized database schemas using MongoDB for performance.
- Handled full-stack development responsibilities including frontend, backend, and API integration.
- Conducted thorough testing and debugging to ensure reliability and stability.

InstaLingual Video Calling App   Live Demo Link   Github Repo Link

React Native   Redux   Node.js   Express.js

MongoDB   Socket.io   Webrtc

- Integrated real-time call notifications and multi-language support for global accessibility.
- Designed and implemented RESTful APIs using Node.js and Express.js for seamless data exchange.
- Managed database operations using MongoDB to handle user data efficiently.
- Conducted end-to-end testing and debugging to ensure robust performance.
